## **Qn2(c). Cost and Risk under the 2023 Medium Term Debt Management Strategy**

1. The 2023 Medium-Term Debt Management Strategy (MTDS) optimal strategy aims to minimize costs and risks through a net financing mix of 50 percent from both external and domestic sources.
2. Externally, the strategy seeks to maximize on concessional borrowing while rolling over the commercial debt.
3. From the domestic sources, the objective is to lengthen the maturity and deepen the domestic markets through issuance of medium to long-term debt securities.

**Table 7** below outlines the cost and risk characteristics of Public debt.

**Table 7: Cost and Risk Indicators**

Risk Indicators	Jun-23 Actual	As at end June 2026	
		2023 MTDS	Optimal Strategy
Nominal debt as percent of GDP	70.8	59.8	
Present value debt as percent of GDP	64.4	53.1	
Interest payment as percent of GDP	5.2	4.4	
Implied interest rate (percent)	7.6	7.9	
<b>Refinancing risk</b>	Debt maturing in 1yr (percent of total)	13.3	10.5
	Debt maturing in 1yr (% of GDP)	9.3	6.3
	ATM External Portfolio (years)	9.4	11.4
	ATM Domestic Portfolio (years)	7.4	8.5
	ATM Total Portfolio (years)	8.5	10
<b>Interest rate risk</b>	ATR (years)	7.7	9.6
	Debt refixing in 1yr (percent of total)	26.6	20.1
	Fixed rate debt incl T-bills (percent of total)	85.2	88.9
	T-bills (percent of total)	6.1	5.5
<b>FX risk</b>	FX debt as % of total	51.5	51.4

*Source: MTDS Analytical Tool*

The outcomes of the optimal strategy include:

1. Reducing cost of debt as evident through the improvement of interest payment as a percent of GDP from 5.2 percent in June 2023 to 4.4 in the medium term. This is attributed to maximization of concessional sources and minimization of commercial borrowing;
2. Minimizing refinancing risks by lengthening the Average Time to Maturity (ATM) of the total portfolio and reducing the debt maturing in one year as a percentage of the total debt and GDP. This is attributed to concessional terms that have longer maturities and issuance of more medium to long term domestic debt instruments; and

- Minimizing interest rate risks in terms of average time to refixing (ATR) which improves to 9.6 years in the medium term from 7.7 years in June 2023.
